

MEN OF COLOR IN ENGINEERING LEADERSHIP SERIES

The College of Engineering Minority Scholars Engineering Program
and the National Society of Black Engineers UW Chapter present

THE MIS-EDUCATION OF MEN OF COLOR IN ENGINEERING AND STEM: WHAT WE CAN DO TO FIX IT

Tuesday, April 18, 2017

5 - 7:00 PM | HUB 334

Drawing on insights and anecdotes from Carter G. Woodson's books, "The MisEducation of the Negro," this talk presents the historical biography and commitments of Dr. Woodson as a way of introducing "miseducation"—what it is and why we should care. Using a blend of data, stats, figures, and empirical research, Professor Strayhorn demonstrates that miseducation continues today, poses a threat to the success of men of color in scientific/technical fields, and identifies ways to

address this issue for educators and students alike. More than broadening participation, let's ensure the success of ALL students!

Terrell Strayhorn

Professor of Higher Education,

The Ohio State University
