In 2012, Professor Strayhorn wrote, "College Students' Sense of Belonging: A Key to Educational Success for All Students", which was his first book-length treatment of the topic. Belonging is a basic human need, sufficient to drive human behavior. All people want to belong and it takes on heightened importance in spaces where some individuals feel vulnerable like diverse learners in college. In this chat, Strayhorn identifies 5 key insights that emanate from his research and draws lines of connection

between them and the roles that college faculty/staff can play. Come to learn, leave inspired to act!

Open to UW administrators, faculty, and staff.
