Students at the 2013 Summer Academy for Advancing Deaf & Hard of Hearing in Computing, at the University of Washington, will show the results of their work in Animation at the Community Premiere. This event will be followed by a dessert social in the adjoining Paul G. Allen Center for Computer Science and Engineering. Also to be shown on this evening will be video highlights of the Summer Academy, describing the students’ progress. This is an academic presentation of Summer Academy students’ achievement in animation, and is not intended for younger audiences.

Seventeen of the brightest deaf and hard of hearing students from all over the United States are now attending the 9-week Academy, where they are taking classes in computer programming and animation, as well as meeting deaf and hard of hearing role models already working in computing. More information on this program is available at www.washington.edu/accesscomputing/dhh/academy. This program is part of AccessComputing, a joint project of DO-IT and the Department of Computer Science and Engineering at the University of Washington, with funding from Bill and Melinda Gates Foundation, Johnson Scholarship Foundation, and National Science Foundation.

To request disability accommodation, contact the Disability Services Office at: 206.543.6450 (voice), 206.543.6452 (TTY), 206.685.7264 (fax), or email at dso@u.washington.edu. The University of Washington makes every effort to honor disability accommodation requests. Requests can be responded to most effectively if received as far in advance of the event as possible, preferably at least 10 days.
