Tips for a Successful Engineering Discovery Days

For Friday:
• Bring Food & Drink
  o Although there are various food options on campus, we recommend you bring a sack lunch and water
  o The HUB is closed and there will be long lines at the dining options
• Travel in Small Groups
  o Bring enough chaperones to split a large group into several small groups
  o We expect approximately 3,000 visitors on Friday so traveling in small groups is more manageable
• Expect Long Lines at Exhibits
  o Prior to arrival on campus, review the program and decide what exhibits your students most want to see
  o Be flexible and respectful
• Plan for Travel Time ON Campus
  o The campus is a large place so allow yourself at least 10 minutes to travel between exhibits and information sessions
  o Maps, directional signs, and volunteers will also help you navigate campus

For Saturday:
• Bring Food & Drink
  o Although there are various food options on campus, we recommend you bring snacks and water
  o The HUB is closed and there may be long lines at the dining options
• Balance Exhibits and Information Sessions
  o Plan to participate in BOTH information sessions and exhibits
  o We recommend picking only 2 information sessions to attend and spending the majority of the time exploring the various engineering disciplines
  o Research information about the University of Washington and the College of Engineering on-line prior to the event in order to narrow your selections
• Plan for Travel Time ON Campus
  o The campus is a large place so allow yourself at least 10 minutes to travel between exhibits and information sessions
  o Maps, directional signs, and volunteers are available to help you navigate
