Configuring your Mac Computer for RemoteApp

To configure your Mac with OSX 10.7 or higher to connect to RemoteApp, please follow the instructions below:

1. Click the Apple menu, and select "System Preferences":

2. In the top row, click on "Security & Privacy":

![System Preferences](image1.png)

![Security & Privacy](image2.png)
3. Make sure the General button is selected at the top, then look for the section titled "Allow apps downloaded from" (if you do not see this, proceed directly to step 7 below):

4. Click the lock in the lower left corner to make changes, and enter your Mac password when you're asked for it:
5. Under "Allow apps downloaded from:" select "Anywhere" if it isn't already selected. A dialog will pop up warning that "Choosing 'Anywhere' makes your Mac less secure." Click "Allow from anywhere".

6. Close System Preferences.
7. Click the Apple menu, and select "App Store":

![Image of Apple menu with "App Store..." highlighted]
8. Search for Microsoft Remote Desktop:

9. Click on "Free":

10. Click on "Install App":

11. If you are asked for your apple ID and password, enter it, and click continue:
12. You will see “Installing”:

13. When it's installed, click on “Open”:

14. Open Microsoft Remote Desktop. The first time you run it you will probably see a dialog similar to the one below. Click “Don't show this again”, then click “Close”, as shown:

15. You should see the main Microsoft Remote Desktop app window. You won't see anything just yet; we need to configure it. To start, click "Remote Resources", as highlighted below:
16. In the URL Field, type "https://gilead.engr.washington.edu/rdweb/feed/webfeed.aspx", then use your NETID\<netid> and password in the fields below, and click "Refresh".
17. You should see a success message similar to the one below:

![Remote Resources pane]

18. Close the Remote Resources pane. You should now see all the resources that you have access to within COE instance of RemoteApp:

![Microsoft Remote Desktop]

19. Double click on any one of the applications, and you'll see a black window up showing the following dialogs:
20. You'll get a security dialog as shown below. Click "Continue":

![Security Dialog](image)

![Connecting RDP](image)

![Negotiating Credentials](image)
21. You will then see a window similar to a Windows 8.1 login progress screen:

22. Finally, your application will run:

When you’re done, simply close your app
