

ENGINEERING DEAN'S SCHOLARS

CONDITIONS OF THE OFFER OF ADMISSION

The year-long Engineering Dean's Scholars program will provide you with an excellent opportunity to build community with other incoming engineering students, hone skills necessary for the rigor of the engineering curriculum and develop your leadership skills. **By accepting your offer to the Seattle campus of the University of Washington's College of Engineering and paying your New Student Enrollment and Orientation Fee (NSEOF) or submitting a fee deferral request online by May 1, 2021, you acknowledge and agree to all of the conditions of admission outlined below.**

1. Participate in the Engineering Dean's Scholars **transition program during Early Fall Start (Aug. 24-Sept. 17), Monday-Friday 9-5pm.** The transition program provides a jumpstart on your UW and College of Engineering experience. You'll get an opportunity to get to know all of the other Engineering Dean's Scholars, earn diversity credits (satisfies a graduation requirement), and ensure you're well-prepared to take on fall quarter and beyond! You'll also develop relationships with staff and faculty in the College of Engineering to start building your professional network at the UW.

2. You will be required to **meet with both your assigned Engineering academic adviser and your assigned Office of Minority Affairs & Diversity academic adviser at least once per quarter.** Your advisers will review your academic progress, provide guidance on your course schedule, and will ensure you're connected to all relevant UW resources to support your success.

3. All Engineering Dean's Scholars will be registered for **a common set of engineering requirements** for their first three academic quarters at the UW. This will allow you the opportunity to engage in the rigor of the engineering curriculum with a cohorted community. Please see the below website for more details about the Engineering Dean's Scholars program of study.

4. Engineering Dean's Scholars will come together throughout the academic year outside of the classroom for meetings and events designed to develop a strong cohort. **I agree to participate** in the Engineering Dean's Scholars activities, meetings, and events for the 2021-2022 academic year.

By accepting your offer to the University of Washington's College of Engineering Seattle campus and paying your New Student Enrollment and Orientation Fee (NSEOF), you acknowledge and agree to all of the University of Washington's College of Engineering conditions of admission outlined above.

I understand that if I accept the offer of admission and do not meet the conditions outlined above, this may result in being transitioned out of the College of Engineering.

For more information on all of the above, please visit: www.engr.washington.edu/deans-scholars
